

# Streamlined, Comprehensive Cybersecurity

Our Security Bundle Powered by MDR

## Nation-State Cybersecurity Working for You

In the cyberthreat landscape, businesses are finding themselves in the crosshairs of advanced attackers. To take the target off your back, we offer a cybersecurity ecosystem – a fully managed, integrated ecosystem of services with our powerful nation-state-grade MDR technology at its core.

Get high-performing, easily upgradeable, and robust cybersecurity that can protect against today's and tomorrow's threats every time.

---

Your cybersecurity strategy needs to provide meaningful visibility across an IT environment. Our solution ensures we are collecting the right information, not mass information. True value is in real-time data interpretation allowing for immediate action.

Here's where our security bundle comes into play.

**1 in 3 security breaches went undetected by traditional cloud, security, and observational tools.**

*2023 Hybrid Cloud Security Survey*

**73% of cybersecurity incidents targeted small businesses.**

*ITRC 2023 Business Impact Report*

# Explore the Ecosystem

The ecosystem we offer ensures that all facets of security work in tandem to support an integrated and streamlined cyber strategy. Combining network visualization, insider threat monitoring, traffic analysis, and endpoint security, our team rapidly detects and neutralizes lateral movement in its earliest stages.

## MDR

**Disrupt the hacker timeline.** Our patented MDR solution is the first contextually aware breach detection and response program on the market. Stop advanced attacks immediately with unparalleled visibility into hacker tradecraft, lateral spread, and remote privileged activity.

### MDR FEATURES

#### Ransomware Response

**Automatically detain ransomware.** Automatically stop all types of ransomware deployments, including drive-by attacks that occur within seconds.

#### Managed EDR

**Streamlined managed endpoint security.** Elevate your EDR with support from our 24/7 SOC and MDR technology to remediate threats in real time.

## Cloud RESPONSE

**Active response for your cloud.** Extend the power of MDR and bring 24/7 expert security monitoring and unified response capabilities to your cloud workflows. Trust leading edge cybersecurity to actively defend your Microsoft 365 and Google Workspace environments.

### CLOUD RESPONSE FEATURES

#### Identity Response for Azure

**Contextual alerting for unauthorized logins.** Gather contextual analysis about the unauthorized use of Azure SSO logins to better protect your connected services.

#### Managed Defender for Endpoint

**Get the most out of your Microsoft 365 investment.** Manage and apply Defender for Endpoint policies to multiple customers with ease.

## MANAGED Application Control

**Curated zero trust.** Harness our Curated Block List, based on real-world threat insight, in addition to custom application settings, for oversight into what matters most, without the operational bottlenecks.

#### Vulnerability Management

**Security visibility unlocked.** Discover and address vulnerabilities within your internal, external, and cloud environments.

## Your Partner in Protection

Our world-class cybersecurity ecosystem is designed to serve your business by completing the hard work for you. Our streamlined onboarding experience gets you covered without compromising your efficiency.
